

The Features of the Living Creatures

We love the book of Ezekiel
We love the visions we see there.
The four living creatures with four faces each.
Such a wonderful thing the Bible teach.
We also see each had four wings
Which have been joined to one another.
And they did not turn as they did move onward
We see that each one just moved straight forward.

(Chorus)

We're overwhelmed by such a picture
Showing the four living creatures
We're astounded by such distinctive features.
Lord, this vision we will treasure
Forevermore.

Looking at the sole of their feet
We see they're straight just like a calf's hoofs.
And under the wings were the hands of a man.
Which gives us an insight into God's plan.
The wings were wings of an eagle
God's strength to us it signifies
He is now our cov'ring, protecting us all
He supplies us with grace when'er we call.

The hands show us we all must have
The most proper human living
Trusting solely in God and on Him rely
Taking up our own cross, the self deny.
The feet show us we must be straight
Must be truthful to one another
We live under the light of His throne each day.
We're so living and fresh, His words obey.
